

Vishal Munday

Backend Tech Lead | AI & Cloud-Native Systems

Jind, Haryana, India • Phone: +91 8570090556 • Email: im@vishu.dev

Portfolio: vishu.dev • LinkedIn: linkedin.com/in/vishal-munday-869024223 • GitHub: github.com/vishu7im

Professional Summary

Backend Tech Lead with 3+ years of experience designing and scaling production-grade backend systems, GenAI applications, and cloud-native platforms. Proven expertise in microservices, real-time systems, and third-party integrations across supply chain, insurance, hospitality, and SaaS domains. Adept at leading backend teams and translating complex requirements into reliable, high-performance solutions.

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS

Frameworks: Node.js, Express.js, React.js, Next.js, Tailwind CSS

Databases: MySQL, MongoDB, PostgreSQL, Redis

Cloud & DevOps: AWS, Firebase, Docker, GitHub Actions

AI / GenAI: LangChain.js, LangGraph, RAG, Agent-to-Agent (ADK), AI Agents, Mem0, GuardRails, LiveKit, WebRTC

Professional Experience

EdgeNRoots Solutions Pvt Ltd

Backend Tech Lead

May 2024 – Present

Remote (Full-Time)

- Led backend and AI initiatives across supply chain, insurance, hospitality, and SaaS clients, delivering scalable production-grade systems and mentoring the backend team.
- Architected MetaOS, a WhatsApp CRM platform with campaigns, automation, analytics, and AI-powered engagement, cutting manual customer-response effort by an estimated 60%.
- Built Aaxel Voice Agent, a real-time voice-to-voice AI agent on LiveKit and WebRTC, achieving low-latency conversational experiences and production-scale reliability.

Icomply Lifescience Solution Pvt Ltd

Full Stack Developer (Intern + Part-Time)

Oct 2022 – Jun 2024

Remote

- Integrated AS2 gateway and XML templates to enable secure, compliant B2B data exchange for life-science clients.
- Designed backend APIs powering dynamic user interfaces, improving frontend responsiveness and data throughput.
- Optimized application performance, increasing system reliability and reducing average response times by an estimated 30%.

Key Projects

FabricatorOS – uPVC SaaS Platform

Node.js, Express, PostgreSQL, Prisma, Docker, React

- Developed a multi-tenant SaaS platform for uPVC and aluminium fabricators covering quotation, work order, and production management.
- Engineered a dynamic window/door configuration engine with live SVG rendering, cutting lists, material optimization, and multi-span topology generation.

TalkTive – WhatsApp CRM Platform

Node.js, Express.js, Redis, WhatsApp API, Microservices

- Led backend development of inbox, campaigns, approvals, analytics, and third-party integration modules for high-volume messaging.
- Designed scalable microservice APIs, asynchronous pipelines, and AI-powered automation agents for customer support orchestration.

Education

BITS Pilani (WILP)

B.Tech. Artificial Intelligence and Machine Learning

2026 – Ongoing

Pilani, India

Guru BrahmaNand Ji Govt. Polytechnic

Diploma in Computer Engineering

2021 – 2024

Karnal, Haryana
