Professional Summary

Backend Tech Lead with 3+ years of experience building scalable backend systems, AI applications, and cloud-native platforms. Expertise in GenAI, microservices, real-time systems, and third-party integrations,

Experience

EdgeNRoots Solutions Pvt Ltd

May 2024 – Present

Backend Tech Lead

Remote (Full-Time)

- Lead backend and AI initiatives for supply chain, insurance, hospitality, and SaaS clients, delivering scalable production-grade systems.
- Developed backend infrastructure for bnbMEhomes , integrating PMS platforms, Respond.io, and AI assistant 'HostBuddy'.
- Led backend development of MetaOS, a WhatsApp CRM platform featuring campaigns, automation, analytics, and AI-powered customer engagement.
- Built Aaxel Voice Agent, a real-time voice-to-voice AI agent using LiveKit and WebRTC, enabling low-latency conversational experiences.

Icomply Lifescience Solution Pvt Ltd

Oct 2022 – June 2024

Full Stack Developer (Intern + Part-Time)

Remote

- Integrated AS2 gateway and XML templates for secure B2B data exchange.
- Designed backend APIs supporting dynamic user interfaces and improved frontend performance.
- Optimized application performance, increasing system reliability and reducing response times.

Projects

FabricatorOS (uPVC SaaS Platform) | Node.js, Express, PostgreSQL, Prisma, Docker, React, SVG Engine

- Developed a SaaS platform for uPVC and aluminium fabricators featuring quotation, work order, and production management modules.
- Designed a dynamic window and door configuration engine supporting casement, sliding, and patio systems with live SVG rendering.
- Built fabrication intelligence including cutting lists, material optimization, profile calculations, cill handling, and multi-span topology generation.
- Implemented multi-tenant architecture, approval workflows, and role-based access control for fabricators, dealers, and administrators.

TalkTive - WhatsApp CRM Platform | Node.js, Express.js, Redis, WhatsApp API, Microservices

- Led backend development for a WhatsApp CRM platform supporting customer engagement, campaigns, and automated communication workflows.
- Architected and developed core modules including inbox, campaigns, approvals, analytics, and third-party integrations.
- Implemented AI-powered automation agents for customer support and workflow orchestration.
- Designed scalable microservice-based APIs and asynchronous processing pipelines for high-volume messaging.

Aaxel Voice Agent | Node.js, LiveKit, WebRTC, OpenAI, Redis

- Built a real-time voice-to-voice AI agent enabling natural conversational interactions with low latency.
- Integrated LiveKit and WebRTC protocols for real-time audio streaming and bidirectional communication.
- Implemented speech-to-text, LLM orchestration, and text-to-speech pipelines for seamless voice conversations.
- Optimized session management, streaming performance, and agent responsiveness for production-scale deployments.

Education

BITS Pilani Wilp

2026 – ongoing

B.Tech. Artificial Intelligence and Machine Learning

Pilani

Guru BrahmaNand Ji Govt. Polytechnic

2021 – 2024

Diploma in Computer Engineering

Karnal, Haryana

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS

Frameworks: Node.js, Express.js, React.js, Next.js, Tailwind CSS

Databases: MySQL, MongoDB,

Cloud/Tools: AWS, Firebase, Redis, Docker, GitHub Actions

AI/GenAI: Agent to Agent Adk, LangChain.js, LangGraph, Mem0, GuardRails, RAG, AI Agents
